Customer Reviews

There are 60 architectural images in this book. There is a wide variety of building styles from older Dickensian style town scenes to traditional homes and buildings to very modern architecture. The designs range from open and easy to color to more intricate with a little more challenge. This is a great coloring book for me to use when I feel the need to have straight lines and order in my coloring. I do a lot of wild designs but sometimes coloring something like a building helps to get my mind in straight order (especially useful when I need to make a shopping list afterward!) While I love my house, coloring in this book gives me an opportunity to think â “ what if I lived or worked here? How would I want it to look. This is my second coloring book by Penny Farthing Graphics. They are published via CreateSpace which is generally used for self-publishing. The designs are drawn by a variety of artists from all over the world and are licensed via Shutterstock.com. What we end up with

is a great coloring book (although on thin paper) with a large and varied selection of designs. The pages are printed on thin white paper which is not perforated. The designs are printed on one side of the page with the back left blank. The designs stop well short of the glued binding and can easily be removed with a pen knife if you so choose. The designs all have either frames to finish the edge of the design or have all of the design elements finished so I am not left hanging without a proper ending point. I really appreciate this care in design as it gives me a more finished looking final page. My gel pens and markers all leaked through this paper. My coloring pencils went on well but left a shadow at the back of the page, too.
