# Meet Mr. Product: The Art Of The Advertising Character

## Synopsis

Here in Meet Mr. Product you'll find a vibrantly colorful tribute to such pop-culture icons as the Jolly Green Giant, natty Mr. Peanut, the Michelin Man, and the countless other advertising characters who have been helping us navigate the grocery aisles and choose our products for years. Offering up a bustling gallery of over 500 spokescharacters, this chunky compendium charts the origins and development of the advertising character and gives brief glimpses into some of their most intimate secrets. (Did you know that the Michelin Man has been spotted with glamorous ladies on his arm? Or that Borden's Elsie the Cow was married to Elmer of household glue fame?) Famous faces and a host of recently rediscovered characters fill Meet Mr. Product's pages to bursting.

## Customer Reviews

Fans of Americana and pop culture are in for a treat when they get this book. In this admittedly small (but almost an inch thick) book there are five hundred+ ad characters (actually more like seven hundred if multiples are included). Divided into eight chapters, Food, Drinks, Kids' stuff, Dining, Technology, Autos, Home and finally Personal and Leisure, they are all in color, captioned and dated. All the well-known characters are included but also many who had a regional existence, like Mr Clean-Up, the 1946 St. Louis Chamber of Commerce antilitter campaigner, or Waddle's Duckling, a 1959 icon from the Portland, Oregon restaurant. Warren Dotz writes a short intro and explains how companies realised that these characters would bring huge concerns down to human scale, especially if they became half human and half product and always with that smiling face. A

useful companion book is 'What a Character', also by the author and it shows many 'Mr Product' icons as three-dimensional figurines, thus reinforcing customer brand loyalty further. Visually the book is a delight to look at, thanks to the design by the author and Masud Husain. Handling this kind of material is a challenge because of all the different shapes and colors but here many of the characters are whole page or four to a page and a nice touch is to show them in the context of an ad, brochure cover or a packet front. I don't think the book could look any better. BTW: I think the paper could have been just a bit thinner for ease of handling and an index would have been useful. Oh, and I was disappointed that Mad magazine wraparound cover painting (by Norman Mingo) of issue thirty-five (October 1957) was not reproduced somewhere, it was most likely the only time that dozens of copyright ad characters were used on a magazine cover. \*\*\*FOR AN INSIDE LOOK click 'customer images' under the cover.

Tons of product logos here, with the bulk of them from the 30s to the 70s. These are reproduced very well, and each of them is dated and carries a two-line description of their purpose and company origin. There are a few pages of introductory front matter that summarize the history of product logos, but the meat of the book is taken up by the graphics, with anywhere from one to four logos per page. I didn't know there were so many anthropomorphic logos, among them Mr. Coffee Nerves, Mr. Dee-Lish, Mr. TV Tube, Phillips Screw Man, Johnny-One-Note, Miss My-T-Fine, Miss Fluffy Rice and Mr. Weatherball. Many of them you'll recognize, and some of them you won't, but all of them will delight you.

A fascinating foray into the sometimes clever, sometimes idiotic, occasionally just plain bizarre (Mr. TV Tube? Dunkie Donut-Head? Phillips Screw Man??) world of advertising characters. Anybody obsessed with kitschy pop culture, especially that of the 50's and 60's, will want this one. You get all the cartoon mascots you've ever seen on "retro" t-shirts at your local Hot Topics, plus hundreds more of varying degrees of obscurity. Indeed there was a period when designers would simply draw a smiley face on a cog and call it "Mr. Cog," and you see a lot of that here, often in hilariously weird contexts - lawn sprinkler heads, pistons, the state of Nevada, a sock, all grinning amiably at you as they pitch themselves. You've got your cartoon pigs voraciously devouring pork rinds, your cigarette boxes with showgirl legs, your anthropomorphic donuts, and robots robots robots. A book like this not only takes you through a wide range of illustration styles, it hints at what life was like in those days, those "simpler times" (though it's arguable how much we've really changed). What better window into American psychology in the 20th century than the commercial devices by which we've

been beguiled into consuming? Aunt Jemima has stories to tell on you.

This is a great reference for vintage advertising character illustrations from days past. I purchased it mainly for inspiration, but it turned out to be a great source of nostalgia too. A number of my co-workers have flipped through it and remarked on remembering some beloved cartoon figure from their childhood. Highly recommend this book to anyone doing illustrations.

First off check the book's dimensions, it's about 5.5 inches by 6 inches. So it's a little small in size but there are a lot of glossy color pages so you definitely get a lot of material. On some pages there are 4 items to a page. Reproduction is good, paper is nice. Overall this was a good value.

The compilers have done a wonderful job; the layouts are absolutely marvelous, a real pleasure to flip through, great retro colors used, and should be an essential addition to the collection of anyone who enjoys 50s & 60s graphics.

I love looking over all the creative, historical advertising trademarks. Very inspiring to have on your shelf. Great reference.

Really great book, i had not much interest in advertising, but this book change my opinion, amazing mascots collection
